PROFILE

Final-year Information and Communication Technology engineering student specializing in cybersecurity. Hands-on experience in application security, code and Jenkins pipeline auditing, SAST/DAST scanning, and the security of Linux, Docker and Kubernetes/K3s environments. Seeking a graduation internship or first junior opportunity in DevSecOps, Cloud Security, penetration testing or application security.

PROFESSIONAL EXPERIENCE

Cybersecurity Intern – Application Security, Audit and DevSecOps 06/2026 – Present
Dot IT Tunisia

- Audited four security scopes: Node.js/React application code, Jenkins CI/CD pipeline, Ubuntu VPS and Kubernetes/K3s cluster.
- Performed and analyzed SAST, DAST and vulnerability scans using Semgrep, SonarQube, Trivy, Burp Suite and OWASP ZAP.
- Identified security weaknesses in code and configurations and produced reports containing evidence, reproduction steps, impact and remediation recommendations.

Graduation Internship – Python and Elasticsearch Development 01/2024 – 06/2024
Dot IT Sousse, Tunisia

- Developed a recommendation web application using Python, Flask and Elasticsearch.
- Integrated Elasticsearch for application data indexing, search and analysis.
- Conducted functional testing and technical validation in a Linux environment.

SELECTED CYBERSECURITY PROJECTS

DevSecOps Pipeline for a FastAPI SOC/OSINT Application
Developed a web security analysis application and designed a Jenkins pipeline automating builds, security checks, dynamic testing, report archiving and deployment preparation. Implemented monitoring with Prometheus, Grafana and Alertmanager.

Agent Tesla Malware Analysis
Performed automated, static and dynamic analysis of a sample in an isolated Windows 7 laboratory, including sandboxing, behavioral observation, impact assessment and detection and remediation recommendations.

Windows 7 Security Assessment – MS17-010 / EternalBlue
Conducted network discovery, scanning, SMB enumeration, MS17-010 validation, controlled exploitation and post-exploitation in an authorized VMware Host-Only laboratory. Assessed privileges, missing patches, business risks and remediation actions.
Additional laboratories: Wazuh SIEM deployment and configuration, log and alert analysis; OWASP Top 10 testing with OWASP Juice Shop in a local environment.

TECHNICAL SKILLS

DevSecOps and AppSec: Jenkins, CI/CD, Docker, Kubernetes, K3s, Semgrep, SonarQube, Trivy, OWASP ZAP, Burp Suite, SAST, DAST, vulnerability analysis.
Penetration testing and detection: Nmap, network reconnaissance, SMB enumeration, Metasploit in laboratory environments, Wazuh, log analysis, Prometheus, Grafana, Alertmanager.
Systems and development: Linux, Ubuntu, Windows, VMware, Python, FastAPI, Flask, Elasticsearch, Git, GitHub.
Cloud: AWS fundamentals and container security.

EDUCATION

Engineering Degree in Information and Communication Technology 2024 – 2027
TEK-UP University – Cybersecurity specialization Tunis, Tunisia
Bachelor’s Degree in Electronics, Electrical Engineering and Automation 2021 – 2024
ISSAT Sousse – Embedded Systems specialization Sousse, Tunisia

CERTIFICATIONS AND LANGUAGES

Earned certifications: RHCSA – Red Hat Certified System Administrator; PCAP – Certified Associate Python Programmer.
In progress: PECB ISO/IEC 27001 Lead Implementer; AWS Certified Solutions Architect – Associate.
Languages: Arabic – native; French – fluent; English – professional proficiency.

LEADERSHIP AND ENGAGEMENT

ISSAT Sousse 4C Center – active member; Tunisian Red Crescent – ambassador; Microsoft Club ISSAT Sousse – group leader.
